## Impressions for Feasibility Refit & New Build

## FEASIBILITY CHECK FOR AN EXTENSION

Our assignment was to check the feasibility for a stern extension to accommodate a Pool on the Main deck & to provide an impression to show the Owner clearly what is possible.

## Our Project Approach

### **SYS Project Approach:**

- SYS is Part of the team.
- We prepare your presentations: Digital & when required verbally.
- Support the Owners Team/ Project team in an early stage with feasibility studies in close cooperation with the engineering team of the yard. We pick up the studies which often are neglected at the early stage due to the tight schedules. All at a “White Label” approach. So there is a detailed package to send to the Lead Designer of the Project.
- For support at exterior detailing we can join the Yards team.
- We have an efficient system to create clear impressions of challenging technical features
- SYS drawings are easy to understand for:
  - Owner
  - Designers
  - Engineers

White Label Design support from Concept to the finest Details
